

Sr. Quality Engineer

Req # 2011-020

Tapemark is a CMO, contract manufacturing organization, focusing on pharmaceutical, medical device and consumer product markets. We work with large, international Fortune 500 corporations as well as small, entrepreneurial organizations – many brands that you'd recognize – but all work is confidential. We're expanding and looking to add a highly-qualified Quality Engineer who can make an immediate impact.

As a Sr. Quality Engineer you will:

Participate as a critical member of Product Launch teams, responsible for successful design, development and commercialization of new projects. Support existing process teams.

Utilize quality by design tools DOE, FMEA, ANOVA, Gage R&R, SPC to ensure processes/products are qualified, validated or verified. Interpret customer's specifications and in-process controls ensuring the process/product meets CQA's and customer quality requirements. Investigate Customer Complaints, incidents, and non-conformances.

Assist Quality Management in the development and training of staff.

Qualifications:

- Minimum Bachelor's Degree in Engineering or science-based discipline and a minimum of 8 years Quality Engineering experience, preferably in the Medical Device or Pharma industry.
- Demonstrated application of quality by design tools, including DOE, FMEA, ANOVA, Gage R&R, and basic/advanced SPC, and tools.
- Experience implementing quality standards, procedures, specifications and corrective actions.
- Working knowledge of ISO 9001 and/or 13485, regulatory standards (cGMP, QSR) and Quality system standards, processes and procedures.
- Excellent written and verbal communication skills, including technical writing skills.

Preferred:

- Six Sigma Black Belt certification
- Knowledge of equipment, production and packaging processes

We're looking for people who share our commitment to Excellence, Responsibility, Integrity, Community, Knowledge and Attitude.
